

REDUCE YOUR ENERGY CONSUMPTION & SAVE

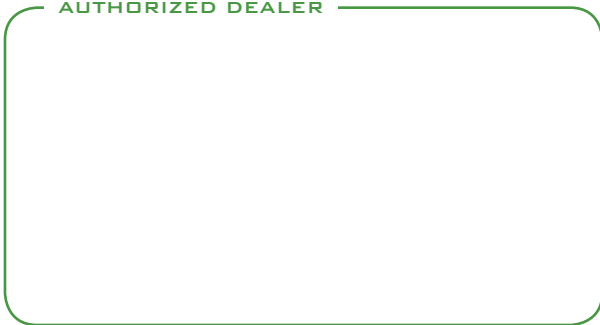

COST EFFECTIVE AND CLEAN ENERGY MANAGEMENT SYSTEMS

COMMERCIAL BENEFITS

Each KiloWatt Master unit has a number of benefits aimed at commercial applications.

- **Save** by lowering overall energy demand which enables consumers to be billed at a lower rate schedule reducing a customer's electric bill
- **Save** at a site with low power factor *and* where the utility charges a penalty for low power factor
- **Save** with reduction of amperes reducing enough kWh to drop electric consumers into a lower rate schedule
- Energy consumption saving up to 20 percent
- Reduced heat from motors

Light industrial and commercial owners have the potential to see significant savings in monthly energy bills. From small businesses to large corporations, Power Efficiency products can save all types of commercial businesses money. Increase your power factor, lower your energy demand and change the way utilities bill you. Commercial customers can see a potential energy savings of up to 20%, depending on which unit they install and how large an inductive load their machines require. We have found businesses wasting money on energy costs who have benefitted from our Power Efficiency products.

XZERES Energy provides commercial customers with several KiloWatt Master units designed specifically for commercial needs as well as customizable units. Custom recommendations depend on your company size, typical energy consumption, monthly electric bill and appliances used.
