NAUTIZ eTicket

Packed with performance

The Nautiz eTicket is a versatile PDA designed for payment transactions and validations. With its category-leading combination of performance features in a small but rugged package the Nautiz eTicket is the perfect handheld for fare collection in public transport. The Nautiz eTicket is designed to provide everything you need for optimum in-the-field computing performance – this handheld offers a total package of unmatched capabilities in a rugged format.

First of all, the Nautiz eTicket is fast and powerful. Its high-speed 806 MHz Xscale processor, 256 MB RAM and 512 MB Flash memory is unsurpassed in the handheld market – this mobile computer can keep up with you. And it's easy to use and practical. With Windows Mobile 6.1, a full VGA, daylight visible screen, and a battery that lasts more than a full workday on a single charge this handheld takes desktop computing efficiency out into the field.

The built-in smart card reader supports various ISO14443 type A/B RFID devices, including the entire MIFARE® family. The contactless electronic link between the card and the reader allows for the fast interface that is needed in security and payment systems.

The Nautiz eTicket is also a feature-rich device. It has an integrated 3-megapixel autofocus camera, and it also includes integrated 2-D imager. It offers GSM/UMTS voice and high speed HSDPA data connectivity with lightning-fast, 3G communication. The Nautiz eTicket has integrated Bluetooth and 802.11b/g, with WPA2 encryption for improved security and CCX certification for better interoperability. And with state-of-the-art SiRF Instant Fix II technology, the Nautiz eTicket's GPS computes positions in seconds.

Finally, this handheld is tough and mobile enough to take anywhere. An IP65 rating means the Nautiz eTicket is impervious to dust and highly water-resistant, and it can withstand drops from 1.8 meters and operate in a wide range of temperatures. It weighs only 410 grams and fits comfortably in your hand.

The Nautiz eTicket brings together the latest features and technology to deliver a mobile handheld device that does it all, and does it well.
